

Insulated Glass Configurations

a. Type: Solar Control Insulating Glass Units – Clear Low-e Configuration

SunGuard® SN 68 (Guardian) + Optifloat (Pilkington)

Performance Values:

- a. VLT 66 percent
- b. SHGC 0.37
- c. Shading coefficient 0.42
- d. Exterior reflectance 11 percent
- e. U-value winter 0.244
- f. U-value summer 0.219

Insulating Glass Unit Construction: 1/4 inch (6 mm) SN 68 on Clear (sputtered) on second surface (2) + 1/2 inch (13 mm) air space w/ black warm edge spacer + 3/8 inch (10 mm) Optifloat

b. Type: Solar Control Insulating Glass Units – Clear Low-e and Low Iron Configuration

SunGuard® SNX 62/27 (Guardian) + OptiWhite (Pilkington)

Performance Values:

- a. VLT 63 percent
- b. SHGC 0.26
- c. Shading coefficient 0.30
- d. Exterior reflectance 11 percent
- e. U-value winter 0.238
- f. U-value summer 0.209

Insulating Glass Unit Construction: 1/4 inch (6 mm) SNX 62/27 on Clear (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6 mm) OptiWhite

c. Type: Solar Control Insulating Glass Units – Low Iron Low-e and Low Iron Configuration

Cool-lite Xtreme 70-33 II on Diamant (Saint Gobain Glass) + OptiWhite (Pilkington)

Performance Values:

- a. VLT 71 percent
- b. SHGC 0.29
- c. Shading coefficient 0.34
- d. Exterior reflectance 11 percent
- e. U-value winter 0.237
- f. U-value summer 0.207

Insulating Glass Unit Construction: 1/4 inch (6mm) Cool-lite Xtreme 70-33 II on Diamant (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6 mm) OptiWhite

d. Type: Solar Control Insulating Glass Units – Low Iron Low-e and Clear Configuration

Cool-lite Xtreme SKN 076 II on Diamant (Saint Gobain Glass) + Optifloat (Pilkington)

Performance Values:

- a. VLT 69 percent

AGNORA Ltd.

200 Mountain Road.

Collingwood, ON

Canada

L9Y 4V5

088000

Exterior Glazing

- b. SHGC 0.34
- c. Shading coefficient 0.38
- d. Exterior reflectance 13 percent
- e. U-value winter 0.236
- f. U-value summer 0.206

Insulating Glass Unit Construction: 1/4 inch (6mm) Cool-lite SKN 076 II on Diamant (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6 mm) Optifloat

e. Type: Solar Control Insulating Glass Units – Low Iron Low-e and Low Iron Configuration

SunGuard® SN 68 on UltraClear (Guardian) + OptiWhite (Pilkington) + OptiWhite (Pilkington)

Performance Values:

- a. VLT 65 percent
- b. SHGC 0.36
- c. Shading coefficient 0.41
- d. Exterior reflectance 15 percent
- e. U-value winter 0.184
- f. U-value summer 0.180

Insulating Glass Unit Construction: 1/4 inch (6mm) SunGuard® SN 68 on UltraClear (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6 mm) OptiWhite + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6mm) OptiWhite

f. Type: Solar Control Insulating Glass Units – Low Iron Low-e and Low Iron Configuration

Cool-lite Xtreme 70-33 II on Diamant (Saint-Gobain) + OptiWhite (Pilkington) + OptiWhite (Pilkington)

Performance Values:

- a. VLT 65 percent
- b. SHGC 0.27
- c. Shading coefficient 0.31
- d. Exterior reflectance 15 percent
- e. U-value winter 0.177
- f. U-value summer 0.170

Insulating Glass Unit Construction: 1/4 inch (6mm) Cool-lite Xtreme 70-33 II on Diamant (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6 mm) OptiWhite + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 3/8 inch (10mm) OptiWhite

g. Type: Solar Control Insulating Glass Units – Low Iron Low-e and Low Iron Configuration

Cool-lite SKN 076 II on Diamant (Saint-Gobain) + OptiWhite (Pilkington) + OptiWhite (Pilkington)

Performance Values:

- a. VLT 66 percent
- b. SHGC 0.31
- c. Shading coefficient 0.36

- d. Exterior reflectance 17 percent
- e. U-value winter 0.178
- f. U-value summer 0.170

Insulating Glass Unit Construction: 1/4 inch (6mm) Cool-lite SKN 076 II on Diamant (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6 mm) OptiWhite + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6mm) OptiWhite

h. Type: Low Iron Insulating Glass Units – Low Iron only Configuration

OptiWhite (Pilkington) + OptiWhite (Pilkington)

Performance Values:

- a. VLT 83 percent
- b. SHGC 0.83
- c. Shading coefficient 0.95
- d. Exterior reflectance 15 percent
- e. U-value winter 0.447
- f. U-value summer 0.476

Insulating Glass Unit Construction: 1/4 inch (6 mm) OptiWhite + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6mm) OptiWhite

i. Type: Solar Control & 4th Surface Passive Low-e Insulating Glass Units – Clear Low-e

Cool-lite Xtreme 60-28 II on Planiclear (Saint-Gobain) + EnergyAdvantage on Optifloat (Pilkington)

Performance Values:

- a. VLT 56 percent
- b. SHGC 0.24
- c. Shading coefficient 0.27
- d. Exterior reflectance 16 percent
- e. U-value winter 0.196
- f. U-value summer 0.171

Insulating Glass Unit Construction: 1/4 inch (6 mm) Cool-lite Xtreme 60-28 II on Planiclear (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6mm) EnergyAdvantage on Optifloat (pyrolytic) on fourth surface (4)

j. Type: Solar Control Insulating Glass Units – Low Iron Low-e and Low Iron Configuration

Cool-lite SKN 076 II on Diamant (Saint-Gobain) + OptiWhite (Pilkington) + OptiWhite (Pilkington)

Performance Values:

- a. VLT 66 percent
- b. SHGC 0.31
- c. Shading coefficient 0.36
- d. Exterior reflectance 17 percent
- e. U-value winter 0.178
- f. U-value summer 0.171

Insulating Glass Unit Construction: 1/4 inch (6mm) Cool-lite SKN 076 II on Diamant

(sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 3/16 inch (5 mm) OptiWhite + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 3/16 inch (5mm) OptiWhite

k. Type: Solar Control Insulating Glass Units – Low-e on Clear and Low Iron Configuration
SunGuard SN 68 on Clear (Guardian) + OptiWhite (Pilkington) + OptiWhite (Pilkington)

Performance Values:

- a. VLT 64 percent
- b. SHGC 0.35
- c. Shading coefficient 0.40
- d. Exterior reflectance 15 percent
- e. U-value winter 0.184
- f. U-value summer 0.180

Insulating Glass Unit Construction: 1/4 inch (6mm) SunGuard SN 68 on Clear (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6 mm) OptiWhite + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6mm) OptiWhite

I. Type: Double Solar Control Insulating Glass Units – Low Iron Low-e and Low Iron Configuration

SunGuard SNR 43 on UltraClear (Guardian) + SunGuard Neutral 78/65 on UltraClear (Guardian) + UltraClear (Guardian)

Performance Values:

- a. VLT 40 percent
- b. SHGC 0.20
- c. Shading coefficient 0.23
- d. Exterior reflectance 29 percent
- e. U-value winter 0.128
- f. U-value summer 0.130

Insulating Glass Unit Construction: 3/8 inch (10 mm) SunGuard SNR 43 on UltraClear (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 5/16 inch (8 mm) SunGuard Neutral 78/65 on UltraClear (sputtered) on fourth surface (4) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 5/16 inch (8 mm) UltraClear

m. Type: Double Solar Control Insulating Glass Units – Low Iron and Clear Low-e and Clear Configuration

Cool-lite Xtreme 70-33 II on Diamant (Saint-Gobain) + Planitherm XN II on Planiclear (Saint-Gobain) + Optifloat (Pilkington)

Performance Values:

- a. VLT 63 percent
- b. SHGC 0.26
- c. Shading coefficient 0.30
- d. Exterior reflectance 14 percent
- e. U-value winter 0.121
- f. U-value summer 0.121

Insulating Glass Unit Construction: 1/4 inch (6 mm) Cool-lite Xtreme 70-33 II on Diamant (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm

Edge Spacer, Black + 1/4 inch (6 mm) Planitherm XN II on Planiclear (sputtered) on fourth surface (4) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 3/16 inch (5 mm) Optifloat

n. Type: Solar Control Insulating Glass Units – Low-e on Clear and Clear Configuration

SunGuard SNX 62/27 on Clear (Guardian) + Optifloat (Pilkington)

Performance Values:

- a. VLT 61 percent
- b. SHGC 0.26
- c. Shading coefficient 0.30
- d. Exterior reflectance 11 percent
- e. U-value winter 0.238
- f. U-value summer 0.209

Insulating Glass Unit Construction: 1/4 inch (6 mm) SunGuard SNX 62/27 on Clear (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6 mm) Optifloat

o. Type: Solar Control Insulating Glass Units – Low Iron Low-e and Low Iron Configuration

Cool-lite Xtreme 70-33 II on Diamant (Saint-Gobain) + OptiWhite (Pilkington) + OptiWhite (Pilkington)

Performance Values:

- a. VLT 65 percent
- b. SHGC 0.27
- c. Shading coefficient 0.31
- d. Exterior reflectance 15 percent
- e. U-value winter 0.178
- f. U-value summer 0.171

Insulating Glass Unit Construction: 3/8 inch (10 mm) Cool-lite Xtreme 70-33 II on Diamant (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6 mm) OptiWhite + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6mm) OptiWhite

p. Type: Double Solar Control Insulating Glass Units – Low Iron and Clear Low-e and Clear Configuration

Cool-lite SKN 076 II on Diamant (Saint-Gobain) + Planitherm XN II on Planiclear (Saint-Gobain) + Optifloat (Pilkington)

Performance Values:

- a. VLT 63 percent
- b. SHGC 0.30
- c. Shading coefficient 0.35
- d. Exterior reflectance 15 percent
- e. U-value winter 0.120
- f. U-value summer 0.121

Insulating Glass Unit Construction: 1/4 inch (6 mm) Cool-lite SKN 076 II on Diamant (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6 mm) Planitherm XN II on Planiclear (sputtered) on fourth surface (4) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer,

Black + 1/4inch (6 mm) Optifloat

- q. Type: Passive Low-e Insulating Glass Units – Passive Low-e on Clear and Clear Configuration
EnergyAdvantage on Optifloat (Pilkington) + Optifloat (Pilkington) + Optifloat (Pilkington)

Performance Values:

- a. VLT 65 percent
- b. SHGC 0.55
- c. Shading coefficient 0.63
- d. Exterior reflectance 20 percent
- e. U-value winter 0.210
- f. U-value summer 0.222

Insulating Glass Unit Construction: 3/8 inch (10 mm) EnergyAdvantage on Optifloat (pyrolytic) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6 mm) Optifloat + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6mm) Optifloat

- r. Type: Solar Control Insulating Glass Units – Low Iron Low-e and Low Iron Configuration
Cool-lite Xtreme 70-33 II on Diamant (Saint-Gobain) + OptiWhite (Pilkington)

Performance Values:

- a. VLT 70 percent
- b. SHGC 0.30
- c. Shading coefficient 0.34
- d. Exterior reflectance 11 percent
- e. U-value winter 0.233
- f. U-value summer 0.205

Insulating Glass Unit Construction: 3/8 inch (10 mm) Cool-lite Xtreme 70-33 II on Diamant (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 3/8 inch (10 mm) OptiWhite

- s. Type: Solar Control Insulating Glass Units – Low Iron Low-e and Low Iron Configuration
Cool-lite SKN 076 II on Diamant (Saint-Gobain) + OptiWhite (Pilkington)

Performance Values:

- a. VLT 71 percent
- b. SHGC 0.34
- c. Shading coefficient 0.39
- d. Exterior reflectance 13 percent
- e. U-value winter 0.233
- f. U-value summer 0.204

Insulating Glass Unit Construction: 3/8 inch (10 mm) Cool-lite SKN 076 II on Diamant (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 3/8 inch (10 mm) OptiWhite

- t. Type: Solar Control & 4th Surface Passive Low-e Insulating Glass Units – Clear Low-e SunGuard SN 68 on Clear (Guardian) + SunGuard IS 20 on Clear (Guardian)

Performance Values:

- a. VLT 66 percent

- b. SHGC 0.36
- c. Shading coefficient 0.42
- d. Exterior reflectance 12 percent
- e. U-value winter 0.203
- f. U-value summer 0.180

Insulating Glass Unit Construction: 1/4 inch (6 mm) SunGuard SN 68 on Clear (sputtered) on second surface (2) + 1/2 inch (13 mm) air space Chromatec Ultra Warm Edge Spacer, Black + 1/4 inch (6 mm) SunGuard IS 20 on Clear (pyrolytic) on fourth surface (4)
